THE SEED-BELT NEWS

Volume 17. BALTIMORE, MD., MARCH 28th, 1934. No. 4

Seeding Under Corn-Hog Program

Under the terms of the Corn-Hog Program in Maryland, land taken out of Corn may be used for planting permanent pasture, soil improvement and erosion preventing crops, not to be harvested. Crops that may be planted are Bluegrass, Red-top, Timothy, Alfalfa, Clover except Sweet Clover - with or without nurse crop. The newly planted pasture may be grazed in 1934, if no nurse crop is used, but cannot be harvested for hay. Contracted acres are released on December 1, 1934. Cash rental that year, in the case of

land producing 30 bushels per acre, would be \$9.00 per acre. This rental will more than cover the cost of seeding to Alfalfa, the best but costliest of all hay crops.

1933 Farm Income Increased

Farm income in 1933 was 24% larger than in '32. One quarter of this gain was in benefit payments by the A. A. A. Dairy products returned 1% less, Vegetables 32% less, Cotton 56% more, Grain 86% more, Hogs 10% more, Poultry 4% less, Cattle 1% more, Fruits 18% more, Tobacco 56% more, Sheep and Wool 40% more.

Professor Metzger, College Park, recommends Iowar, Cornelian and Fulghum Oats for Maryland.
